FOR PROTEIN PERFORMANCE

HIGH ENZYME ACTIVITY – 100,000 U/G ACTINIDIN ACTIVITY

LOW DOSE OF 200 MG/ 20-30G OF PROTEIN

REAL USERS. REAL RESULTS.

THE ACTINIZYME® EXPERIENCE STUDY

This exploratory Actinizyme® user test was carried out to understand consumers' experience of taking Actinizyme® alongside pea protein. Five consumers tracked their digestive symptoms daily across a two-week period, first with protein alone and then with protein plus Actinizyme®, to gather early, descriptive insight into real-world tolerability and user experience..

WHAT WE TESTED:

WEEK 1
Days 1–7
25g Pea Protein alone

WEEK 2
Days 8–14
25g Pea Protein + 200mg Actinizyme®

DAILY QUESTIONNAIRE

Covering digestive symptoms, completed once per day.

END-OF-USE FEEDBACK

Capturing experience, perceived changes, and product feedback.

5 PARTICIPANTS

Gave qualitative and quantitatvie feedback.

WHAT USERS TOLD US:

4/5
Reported some improvement in digestive health

3/5
Specifically mentioned reduced bloating

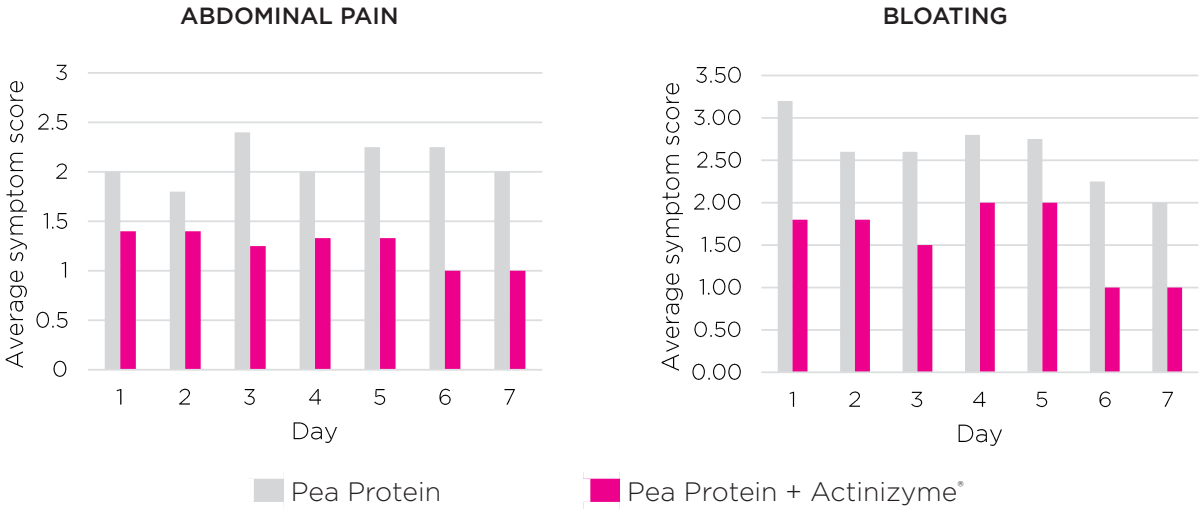
TIMING OF CHANGE

Participants who noticed a change generally reported it within the first few days of starting Actinizyme® (Days 8–10).

REAL SCIENCE. REAL PEOPLE. REAL RESULTS.

PROUDLY BROUGHT TO YOU BY Anagenix.

WHAT WE SAW:



Higher scores indicate more severe symptoms.

WHAT PARTICIPANTS SAID:

"By the second week, I didn't have any bloating whatsoever."

DIGESTIVE EXPERIENCE

"I just found it such an easy product to use... and the taste, I thought it was excellent."

EASY TO USE

"I'll be looking for it when it comes out."

WOULD USE AGAIN

"I've already talked to my sister... and one of my friends. So I've given it like 10 out of 10."

10/10

PRODUCT EXPERIENCE:

FORMAT 5/5
Found it easy to take

TASTE 4/5
Liked the taste

CONTINUE 4/5
Would recommend it

KEY TAKEAWAY:

In this small user test, participants reported positive digestive experiences during the protein + Actinizyme® phase, with abdominal pain and bloating showing the clearest descriptive changes.
